

Physical Conditions of the Circumgalactic Medium

Hsiao-Wen CHEN

(University of Chicago)

Tuesday, August 1, 2023, 08:30–10:30

This lecture will provide a broad overview of key objectives in the circumgalactic medium research and how they are connected to the overall understanding of galaxy formation and evolution. We will review different empirical constraints that can be inferred from absorption and emission observations with particular attention on systematics.
